Education

University of Colorado Boulder, USA Aug. 2016 - Present
Advisor: Michael J. Paul, Jordan Boyd-Graber; 4th year Computer Science PhD student

University of Tokyo, Japan Sep. 2014
M.S. in Information Science and Technology; Advisor: Akiko Aizawa

International Christian University, Japan Mar. 2012
B.A. in Computer Science and Mathematics; Advisor: Grant Pogosyan

Professional Experience

Research Assistant, University of Colorado Boulder, USA Aug. 2016 - Present

- Proposed a new intrinsic measure to evaluate cross-lingual word embeddings. We show that this measure is correlated to multiple cross-lingual downstream tasks including document classification and bilingual lexicon induction.
- Investigating on graph convolutional network-based method for obtaining cross-lingual word embeddings.

Applied Scientist Intern, Amazon.com, USA May 2018 - Aug. 2018

- Built a cross-lingual slot tagger using cross-lingual embedding as the feature for LSTM-CRF with language-adversarial auxiliary function (gradient reversal).
- The trained cross-lingual slot tagger is superior to the baseline trained only on target language only when the training data size is small.

Software Engineer, Amazon/A9.com, Japan Oct. 2014 - Aug. 2016

- Built a JA/ZH language detector for search queries with recall > 0.8.
- Built a semi-supervised CRF-based Japanese query label tagger with F1 = 0.91.

Software Engineer Intern, Amazon/A9.com, Japan Nov. 2013 - Feb. 2014

- The first search engineer to intern at Amazon Japan.
- Detected JA-EN transliteration pairs with F1 > 0.9 using EM algorithm.

Part-time Engineer, Atilika, Japan Aug.- Nov. 2013, Apr.- Sep. 2014

- Built a dictionary with 8000+ product names for JA named entity extractor.
- Built a EN to JA transliteration generator. Achieved around 60% in accuracy@1.

Software Engineer Intern, Cookpad, Japan July 2013 (one month)

- Built a recommendation system for related topics on the community site. Accomplished approximately 1.5% of the whole user click rate.

Current Projects **Graph-based Cross-Lingual Word Embeddings** 2019 - present

- Proposing to use graph convolutional network to create cross-lingual embeddings.

Selected Past Projects **Intrinsic Evaluation Measure for Cross-Lingual Embeddings** 2017 - 2019

- Developed a graph-based intrinsic measure to evaluate the quality of cross-lingual embeddings.
- <https://www.aclweb.org/anthology/P19-1489>

Multilingual Topic Model on Zika tweets 2017 - 2018

- Investigated whether Polylingual LDA (PolyLDA) outputs both monolingually and cross-lingually coherent outputs given small number of aligned tweets across multiple languages.
- We translated around 1% of whole tweets and run Poly LDA to capture and summarize tweets in English, Spanish, and Portuguese.

Finite State Transducer (FST) for Kuromoji 2015

- Replaced a double-array trie to an FST to build a dictionary for Kuromoji, a java-based Japanese tokenizer used in Lucene, Solr, and Elastic Search.
- Available at <https://github.com/atilika/fst>

Academic Services

- Program Committee: Workshop on Noisy User-Generated Text (W-NUT) 2019
- Secondary Reviewer: ACL 2019, EMNLP 2017, WWW 2017

Academic Honors

- Dean’s Fellowship (CU Boulder) 2016
- Best Bachelor thesis in CS and Math (Gödel Foundation Prize) 2012

Computer and Language Skills

Languages: Proficient: Python, Java; Intermediate: C++, Pig, Go

Software: PyTorch, Git, Vim, L^AT_EX, MySQL

English: TOEFL iBT 101 (2015)

Domain-specific: machine learning, natural language processing
